Re: Ralph E. Bucknam

U.S. Patent Application No. 10/066,847 ✓

ENERGY FINDING TECHNIQUE AND TYPICAL USEFUL DEVICE

Filed February 4, 2002

It is now *exactly 6 months* since I Petitioned your Office to make Special the above disclosure of a new approach to finding useful energy. I have not received a word from you.

Enclosed is pamphlet entitled CORRECT MATHEMATICS AND PHYSICS For the 21st Century which I have submitted to the Library of Congress for copyrighting. You will see that, *in absolutely exact mathematical terms*, Fig. C thereof explains this new technique for finding useful decay energy. As soon as the Scientific Community comes down from its "high horse", you may be sure many new forms of useful energy will begin to appear.

Respectfully,

Ralph Bucknam

Of Council and Inventor
